

FEES

ZOOM VISIT:

This is an opioid addiction medication management program. Treatment is open ended, \$30 per week, and you come back when you want. We use a ladder-system where you start out at 1-week enrollments (\$30 per visit). Over time, you can progress up to a maximum of 4-week enrollments (\$30 x 4 = \$120 per visit).

GENERAL LABS (optional):

Due to the cost of general labs having risen pre-to-post pandemic from \$20 to \$160, Dr. Mitchell no longer offers general labs (liver and kidney function tests). Instead, he will confirm with you at all follow-up appointments that you either have insurance, or access to outpatient Urgent Care, should you want to see a primary care doctor or to do general labs.

PRESCRIPTION TRANSFER:

\$15 - see the "Pharmacies and Transfers" download. This fee is usually waived for a first-time transfer if it is done during Dr. Mitchell's regular office hours.
